Martin Schiefelbusch

I.	Introduction to this book	15
1.	Crossing borders - a simple and complicated task	15
2.	Overview of contents	16
3.	Governing infrastructures - the research context	18
4.	Standardisation and integration - key definitions	20
5.	The “railway age” and “automobile age” as periods of study	23
6.	The Railway as means of integration: the shrinking of spatial distances	24
7.	The Railway as object of integration: the need for coordination in the system	26

Martin Schiefelbusch

II.	Railway policies and programmes - the “internationality of railways” revisited The role of international transport from the railway industry’s point of view	33
1.	Introduction, topic and definitions	33
2.	Data sources	34
3.	International passenger services in the Journal of the Association of German Railway Administrations	36
3.1	The railways on the transport market - debates on integration and equity	36
3.2	Instruments for international collaboration and integration	41
3.3	Long distance and international service development	44

4.	The future of international passenger trains in the European transport policy debate in the 1970s	47
4.1	International collaboration	48
4.1.1	Calls for closer cooperation	48
4.1.2	The basic options	50
4.1.3	The power of established structures	52
4.2	Market environment	54
4.2.1	The railways' challenged position	54
4.2.2	The "allocation" of transport tasks	56
4.3	Service development	57
4.3.1	Trans Europ Express - a soft standard for service and vehicle concepts	57
4.3.2	The UIC's Prospective Research Commission	60
4.3.3	Customer care standards	62
4.3.4	Rethinking international express services around 1970	64
4.4	Infrastructure development	67
5.	Analysis	68
6.	Outlook	72

Martin Schiefelbusch

III	International infrastructure projects	83
1.	Introduction: From vision to agreement	83
2.	Crossing the Alps: The Gotthardbahn	86
2.1	Structural issues	86
2.1.1	Geographical overview and key historical data	86
2.1.2	The geopolitical situation: a case of balancing and uniting interests	89
2.1.3	Institutional arrangements: a "connecting" project	91
2.1.4	Construction - an example of forced collaboration	93
2.2	The process of debating and implementing the route	95
2.2.1	Decades of debate	95
2.2.2	Early ideas	96
2.2.3	Choice of route	97
2.2.4	Alternatives?	100
2.2.5	Nationalisation or "the cow stupid enough to let itself be milked to death"	101
2.3	Content - service design issues	104
2.3.1	The international treaties and the standard of service	104
2.3.2	Case study: International infrastructure connections	108
2.3.3	Case study: The first timetable for the Gotthardbahn	111

3.	Closing a missing link: the Vogelfluglinie	115
3.1	Structural issues	115
3.1.1	Setting	115
3.1.2	National requirements - conflicting needs	121
3.1.3	Route selection: From a 70m high fixed link to “incremental improvements”	123
3.1.4	Institutional arrangements	126
3.2	Procedural issues	128
3.2.1	Defining the collaboration	128
3.2.2	Competitive manoeuvring: Temporary solutions?	135
3.2.3	Funding: The challenge of breaking even	139
3.2.4	A competitive market: Monopolists under pressure	143
3.2.5	Beat the queues? Growth of demand and addition to capacity	153
3.3	Content - shaping a complex project	158
3.3.1	Planning the offer	158
3.3.2	Enhancement of feeder routes	166
3.3.3	Rail freight services - the “matter of life and death”	169
3.3.4	Standardisation of vessels	187
3.3.5	Take your competitor on board: The VFL as an intermodal link	189
4.	Synthesis	194
5.	Outlook	203

Martin Schiefelbusch/ Sonja Ziener

IV.	“Seamless travel” - international rover tickets for rail travel in Europe	217
1.	Introduction	217
1.1	The case studies	217
1.2	Research review and approach	218
2.	The role of fare standards in railway development	220
3.	The ticket book of the Association of German railway administrations	224
3.1	Terminology	224
3.2	Origins and driving forces	227
3.3	Introduction	229
3.4	Discussion on the details of the offer	229
3.5	Permanent establishment of the flexible ticket book	231

3.6	Development of the ticket book over time	231
3.6.1	“External parameters” – prices, terms and conditions, area of validity	231
3.6.2	“Internal parameters” - organisational arrangements, ticket handling and design, revenue allocation	243
3.7	The ticket book in the general debate on the fare system	250
3.7.1	Attempts for reform within the existing system	250
3.7.2	Alternative models	252
3.8	Usage patterns and volumes	254
3.9	Societal impacts	257
4.	Interrail	259
4.1	Origins and driving forces	260
4.2	Decision process and introduction	264
4.3	Development of the InterRail over time	266
4.3.1	“External parameters” – prices, terms and conditions, area of validity	267
4.3.2	“Internal parameters” - organisational arrangements, ticket handling and design, revenue allocation	275
4.4	Usage patterns and volumes	278
4.5	Societal impacts	281
5.	Synthesis	283

Christian Henrich-Franke

V.	Integration, co-operation and standardisation - a comment	295
